## [Webex Client For Outlook On Mac Troubleshooting](#)

The screenshot displays the 'Audio and Video' settings page for the Webex Client For Outlook On Mac. The page is divided into several sections:

- Audio PIN:** A toggle switch is currently turned off. Below it, a note states: "Your PIN must be exactly 4 digits. It can't contain sequential digits, such as 1234, or repeat a digit 4 times, such as 1111."
- Personal Conferencing:** A section with a dropdown arrow icon.
- Personal conference number:** A table listing three toll numbers:

US Toll	+1-415-655-0001
Canada Toll	+1-647-484-1598
US Toll	+1-415-655-0001
- Account Information:** A section stating "You can set up three Personal Conferencing accounts in your preferences." Below this, a table shows details for "Account 1":

Account 1	Default
Host access code	24529157
Attendee access code	24529872
- Generate an account:** A blue link to create a new account.

The service has been upgraded to be cross-platform in time for next week's Macworld Expo and throws in a couple other goodies like a remote Webcam viewer (so you can spy on your home computer from the office and visa versa), and a guest pass system that lets you send someone a one-time coupon to use your computer from wherever they are.

In this case, run latest java run-time installer and restart browser(if required).. With one click from the Home tab, you can start a meeting in your Personal Room or join someone else's.. As a start, WebEx released an iPhone-compatible version of the PCNow service in late August of last year that included mobile file access, and integration with Skype and Outlook.
